

EXCEPTIONAL CARE

Personal Preferences Program ensures that each resident is able to transition into their new home on their terms, by getting the right level of care to their apartment at the right time. As the name implies, the goal of Personal Preferences is to use the personal information we learn about our residents from family members, and themselves to design services and schedules around their own routines, habits, and care needs. We focus on individual wellness, and encourage continued independence with a tailored plan of assistance provided by well-trained team members available 24-hours a day.
